

Microplate Reader MR-4000

Description

Microplate Reader MR-4000 is a single mode microplate readers are used for detection technology with 8-channel manifolds as standard accessories for use with standard 96 wells plates. Covers the absorbance range 0 - 4.000Abs with bandwidth <8nm and measured quickly, which is significantly faster than other current microplate reader methods. End Point, fixed time, Kinetic make the MR-4000 the best platform for any clinical, biotechnology research and pharmaceutical laboratory applications. Can stored up to 100 programs and 100,000 test records in a single unit. Maintain all important measuring parameters including ABS, Cut-Off, Single Standard, Curve, Multi- Percent Log, Linear, Exponential, Power, 4PL Regression. A multi-mode reader has several benefits for laboratories applications ranging from ELISAs to nucleic acid and protein quantitation to cell imaging. Together with multiple microplate services and detection modes into a single, more versatile unit may be an ideal choice especially if you have limited area and performed 12 assays in a single plate.
